Water Conservation Tips

Fresh water is precious, and periods of dry spells like the one experienced last fall can stress our local water supplies. The average household uses about 380 gallons of water each day. Here are some tips of what you can do to conserve fresh water and lower your water and sewerage bills.

1. STOP LEAKS (13.7%)
- Even the smallest leak can waste 25 gallons a day. A leaking toilet can waste 200 gallons a day.
- Install leak detection tablets in your toilet tank.

2. TOILET (20.7%)
- Install a water-saving toilet as a simple cost for toilets, etc. Each flush can save up to five gallons of water.
- Install a new toilet: place a brick in your toilet tank.

3. LAUNDRY (15.7%)
- Add a full load of water to the load instead of using the dishwasher.
- Use a great deal of water and add unnecessary clothes as well as materials to the sewer system or septic system. These materials are expensive and difficult for our waste water treatment plants to separate and are detrimental to maintaining sewers. Better yet, start composting!
- Use a detergent for washing clothes and cleaning vegetables.
- Keep a bottle of cold water in the refrigerator.
- Install from 40 gallons a day. A leaking toilet can waste 200 gallons a day.
- Ask the experts.
